## Color Filter Set for HERO5

Thank you for purchasing INON product.

The 「Color Filter Set for HERO5」is packaged of three different color correction filters; for green water, shallow water (up to 15m/50ft) and deep water (15m/50ft or deeper) to reproduce natural color with less blue cast when using GoPro®『HERO5』with 「Dive Housing for HERO5」(60m/197ft)

- Package contents:**
- Pink Filter ×1 ①  
(for green water)
  - Orange Filter ×1 ②  
(for shallow water up to 15m/50ft)
  - Red Filter ×1 ③  
(for deep water 15m/50ft and deeper)
  - This user manual

- Compatible products:**
- GoPro® 『HERO5』
  - Optional 「Super Suits Dive Housing for HERO5 Black (60m/197ft)」

「Orange Filter」is installed

- Installation**
- Carefully bend top tab of the filter in a staircase pattern by using tweezers etc as per image (A).
  - Put the filter in housing lens port then set a GoPro® camera (B). Make sure that the tab does not obstruct camera lens (C)

(A)

(B)

(C)

- Usage**
- Using the filter with bright ambient light like at very shallow depth, may have significant reddish tone.
  - It would be recommended not to use artificial light source as it will enhance filter color too much.
  - When using the 「Red Filter (for 15m/50ft or deeper)」, set ISO limit as low as practical to avoid possible noise with higher ISO as the filter blocks certain amount of light passing through it shifting ISO too high.
