

INON

INON Protector II

Thank you for purchasing INON product.

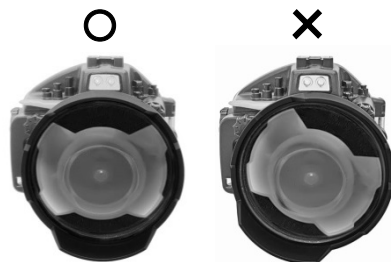

The INON Protector II is attached on INON Dome Port series to prevent accidental damage on port lens and also blocks unnecessary light to obtain clear image. The protector helps to stabilize the whole component when facing down assembled housing to set a camera in a housing. So the Protector II is recommended to use always together with Dome Port series.

- Package contents** :
- Protector II [①] ×1
 - Set Screw [②] ×5 (including one spare)
 - Allen Wrench [③] ×1
 - This user manual ×1

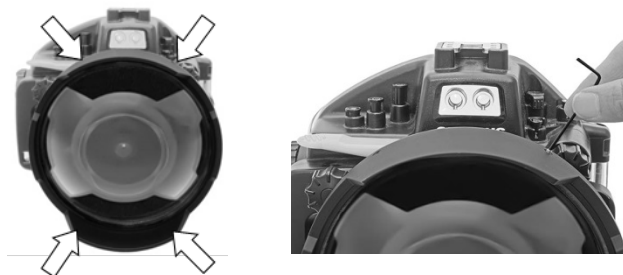

- Compatible port** : (as of August 2007)
- Dome Port II (S/N:80295 or later)
[Not compatible with an earlier model]
 - Dome Port Olympus

- Installation method** :
- The Protector II has to be installed AFTER dome port has been fixed on a housing. First, set the Protector II on the compatible dome port so that large flanges seat at 6 and 12 o'clock position.

Next, push small flanges with your finger to completely set the edge of the Protector II in the groove of the Dome Port and fix them with supplied 4 set screws. Tighten set screws in diagonal order. DO NOT tighten too much to avoid damage/deformation of the Protector II.

- How to disassemble:**
- Detach the Protector II in reverse procedure of installation. Make sure to detach the Protector II BEFORE detaching the Dome Port from a housing.
